Interview: #1

Participant: person_1

Age: 25

Occupation/ situation: Developer

Interview method: In person

Cooking habits

1. How often do you cook?
- Sometimes, around 4 times a week.
2. What kind of meals do you usually cook?
- Simple dishes, like pasta and pizza.
3. How often do you use recipes when cooking?
- It varies, if it's something new, I use it. If it's a regular dish, I usually don't. Maybe once a week.
4. Where do you usually find recipes?
- Internet.
5. What device to you normally use when looking for recipes online?
- Usually finds them on my phone, reading them on the PC.

Finding recipes

6. Imagine you want to find a recipe for dinner. How would you normally search for it?
- Umh, suggestions for a quick and easy dinner.
7. What information do you usually look for before deciding to make a recipe?
    - ☒ Ingredients
    - ☒ Preparation time
    - ☒ Cooking time
    - ☐ Difficulty
    - ☒ Number of servings
    - ☐ Dietary information
    - ☐ Calories/nutrition
    - ☒ Reviews/ratings
    - ☒ Photos
    - ☒ Other:

- How many steps there are.

8. What makes you choose one recipe over another?

- If the picture looks better, if the food looks better than the other one. That is important.

9. Are there any things you usually search for specifically? For example: gluten-free, vegetarian, cheap, quick, high-protein, etc.

- Gluten-free, quick, maybe if there's meat or something like that.

Frustrations

10. What annoys you about recipe websites or apps?

- Confusing steps or recipes. Unclear instructions. Also, another thing, some websites have a feature that keeps the screen on, while others don't. I like that.

11. Have you ever given up on using a recipe because the website/app was difficult to use? What happened?

- No, I don't think I have done that.

12. Is there anything you wish recipe websites did better?

- Mmm. I'm not quite sure. I'm trying to think of something that could be improved. If multiple things are being made at the same time, that could be explained or illustrated better in the steps.

Recipe information

13. What information would you want to see immediately when opening a recipe?

- Firstly, it's about how long it takes and the ingredients first. I also want the photo for the recipe.

14. How important are serving sizes to you? Do you ever change them?

- Yes, I change it if I'm having people over. That's important to me.

15. How important is preparation/cooking time?

- Not super important.

16. How important are dietary tags or filters?

- Hmm. It's not that important to me, but it's nice to be able to filter by certain things. Like if you want a chicken recipe, for instance, or specific items. So, it could be handy to have.

17. Would you use features such as saving recipes, favorites, shopping lists, or meal planning? Why/why not?

- It's great to have favorites, so you know what you like and what you don't. The shopping list feature is also nice.

Open question

18. If you could design your ideal recipe website/app, what would it have?
- Recipes with pictures and ingredients. And clear instructions.

19. Is there anything else about finding or using recipes that you think would be useful for us to know?
- No, nothing I can think off.
